

## WHO WE ARE

FEFANA is the united voice of the specialty feed ingredients (SFIs) industry in Europe. Our membership comprises manufacturers and traders of feed additives, functional feed ingredients, premixes and other mixtures of specialty ingredients.

## WHAT WE DO

FEFANA informs about the demonstrated benefits of SFIs, which contribute with solutions to current societal challenges. We facilitate the dialogue between EU institutions and feed business operators to ensure feed and food safety in a fair and competitive market.

## WHY SFIS?

SFIs are added in very small quantities to feed. They can improve the properties of feed, support farmers in their sustainable farming efforts and help reduce feed waste, CO2 emissions and the use of antibiotics - just to mention a few benefits.

Ingredients that most people would recognise are vitamins, minerals, amino acids and flavourings.

## THE GREEN DEAL AND THE FARM TO FORK STRATEGY:

Delivering on shared objectives

# How do FEFANA members contribute?

The European Green Deal aims at transforming the EU in a sustainable and resource-efficient economy, with no net emissions by 2050.

The specialty feed ingredients (SFIs) sector, represented by FEFANA, is a key contributor to a sustainable agri-food system, as envisaged by the Farm to Fork strategy of the Green Deal.

FEFANA members bring innovative solutions into animal nutrition, directly and indirectly benefiting society and the challenges it is currently facing.

To deliver on the ambitious Green Deal agenda, value chain partners and policy makers must join forces.
